My name is Fabián Balmaceda Rescia and I am from Costa Rica. I was born and brought up in Heredia. I completed college at the University of Costa Rica. I had developed a keen interest in computers in the school itself and eventually pursued my education that directed my career opportunities to the IT industry. I completed my graduation in Computer Science and Multimedia, and I'm doing a minor degree in 3D Animation and then started preparing for Masters in Artificial Intelligence. As of now, I am a professional computer programmer with knowledge of various multimedia programs like Blender, Unity 3D, Unreal, Maya. I had work in web development projects with Angular, ReactJs, AdonisJs, Laravel, NodeJs, Drupal and Wordpress. I have experience in, C#, PHP, Java, JS, and Python. Apart from programming, I like participating in art and cultural events and I have a passion for sport and training.

I love working with Game and multimedia technologies. I started learning in the University's courses and as an IT assistant in my second year, I develop the University website (<http://www.srp.ucr.ac.cr/>) while learning Drupal in 2 months. Since then I have developed other web apps (<http://icc.fce.ucr.ac.cr/>) and projects as a freelance, and have been continually teaching myself about it. I also work in the development of super combat fighter I add new game modes, fixing bugs and mechanics and game testing in Unity. We develop a stable version for YouTubers and we present the game in PAX West 2018 and launch a Kickstarter campaign. I would enjoy bringing my skill set and enthusiasm to Gemini. I also have experience with 3D programs like Maya and Blender, currently I'm doing a Licentiate degree in 3D Animation at the University of Costa Rica expect to end on December 2019 and I plan to do a master degree in AI in the future, I would like to improve my skills and learn new ones with Gemini.

With my determination, passion for multimedia development and ability to learn new technologies.

Thank you for your consideration and I look forward to hearing from you soon.

Fabián Balmaceda Rescia.
